Education

Madan Mohan Malaviya University of Technology — Gorakhpur, UP
Master of Computer Applications — *Nov. 2021 – Jul. 2023*

Technical Skills

Languages: Python, JavaScript, HTML/CSS, SQL
Web Frameworks: Django, Django ORM, DRF, Django Channels, Odoo, Flask, FastAPI, React.js, Node.js
Databases: PostgreSQL, MySQL, SQLite
AI/LLM: Agent Evaluation, Prompt Engineering, SFT, Rubric-Based Evaluation, pass@k, Model Testing
AI Tools: OpenHands SDK, LiteLLM, pytest, Frontier-Model APIs, Docker, nftables
Web Scraping: Selenium, BeautifulSoup, Requests, Proxy Rotation, CAPTCHA Handling, XPath
Data & Processing: Pandas, NumPy, Data Cleaning
API Development: RESTful, GraphQL
Other Tools: PowerBI, MS-Excel etc.
DevOps & Deployment: Docker, Kubernetes, Git, GitHub, AWS (EC2, S3)
Integrations: Payment & KYC APIs, WhatsApp APIs, SMS Gateways (MSG91), Email Services, Push Notifications

Experience

Python FullStack Developer — Feb 2026 – Present
Quess Corp Limited (Client: Ethara AI) — *Gurugram, HR*

- **AI Agent Evaluation:** Evaluated AI agents and foundation models for accuracy, latency, cost, and reliability using internal benchmarks and pass@k testing.
- **SFT Dataset Preparation:** Prepared training datasets by cleaning data, removing duplicates, standardizing formats, and checking data quality for supervised fine-tuning (SFT).
- **Model Testing:** Tested models on reasoning, information extraction, and summarization tasks using Python and pytest.
- **Tools and Runtime:** Used Python, Docker, OpenHands SDK, LiteLLM, nftables, and frontier-model APIs for agent execution and sandboxed evaluation.
- **ARC-AGI-3:** Created training games, trajectories, and evaluation harnesses, with quality checks for prompts, datasets, and outputs.
- **Backend Development:** Built custom Odoo addons and REST APIs for dashboard KPIs, analytics, budget tracking, and task management using ORM and caching.
- **Notifications and Logging:** Developed automated project notifications and a centralized log feed to track job statuses, processing logs, and project updates.

Python Developer — Aug 2025 – Feb 2026
Pranathi Software Services Pvt. Ltd (Product: BharatPayroll – HRMS) — *Remote*

- **Payroll System Development:** Worked on end-to-end payroll processing including overdays calculation, salary credit computation, referral bonus automation, and payroll workflow management. Generated statutory compliance forms such as Form 16, Form 3A, Form 15G, and related reports.
- **Offboarding Module:** Independently designed and developed the full resignation workflow including employee-initiated resignation, HR/manager approvals, NOC clearance process, exit interview questionnaire, and multi-channel notifications (Email and WhatsApp).
- **Applicant Tracking System (ATS):** Built complete ATS including candidate creation, resume parsing, JD parsing, job order creation, test link generation, online assessment scoring, candidate-job linking, referral flows, stage timelines, multi-channel notifications (Email and WhatsApp), and candidate pipeline status tracking (Interviewed, Rejected, Selected).
- **HRMS Integration:** Synced ATS with HRMS modules such as departments, designations, and employee records for seamless onboarding of selected candidates.
- **Employee Referral System:** Developed referral management module integrated with ATS where employees receive automated referral incentives upon successful candidate selection.

- **Multi-Tenant Architecture:** Implemented scalable multi-tenant structure with tenant-level configurations, dynamic templates, customizable settings, leave approval workflow, attendance rules, and various reports (biometric, system tracking, audit, missing employee data, cost center).

Python/Django Developer Feb 2025 – Aug 2025

Jewar International Technologies Pvt Ltd (Mobile App: Anekk Fintech) *Noida, UP*

- Developed complete fintech/NBFC backend with KYC flows (Aadhaar, PAN, selfie, video), loan applications, multi-step authentication (OTP, MPIN), and multi-role dashboards (organization, sub-admin, employee).
- Built and optimized multiple APIs for mobile app using Django, DRF, ORM, raw SQL, and query optimization techniques.
- Integrated 3rd-party services: video KYC, PAN/Aadhaar verification, MSG91 SMS, WhatsApp, email, push notifications, OTP login/reset.
- Implemented multilingual support and app-level translations.
- Developed full loan lifecycle: calculations using NumPy/Pandas (interest, disbursal, deductions), sanctioning, disbursement, repayments, and dashboard analytics.
- Generated public PDFs (KFS, agreements, sanction letters), automated documents, and deployed applications on AWS.

Python Developer Aug. 2023 – Jan. 2025

Masthead Technologies Pvt Ltd *Noida, UP*

- Developed, deployed, and maintained large-scale web scraping systems using Python (Selenium, BeautifulSoup, Requests) to extract structured data from major e-commerce platforms including Walmart, Home Depot, Wayfair, Lumens, Amazon, and Target.
- Implemented proxy rotation, CAPTCHA handling, dynamic waits, and anti-bot bypass strategies to ensure reliable and scalable data extraction from dynamic web applications.
- Automated recurring scraping workflows for scheduled data updates, optimizing performance, fault tolerance, and script scalability.
- Processed, cleaned, and structured high-volume scraped datasets using Pandas and SQL, ensuring data accuracy and readiness for analytics pipelines.
- Documented scraping architectures, workflows, and monitoring processes to maintain operational transparency and system maintainability.

Projects

HRMS Lite – Full Stack Human Resource Management System | *React, TypeScript, FastAPI, PostgreSQL*

- Developed a production-ready full-stack HRMS with React + TypeScript frontend and FastAPI backend featuring employee management, attendance tracking, and real-time dashboard analytics.
- Built RESTful APIs using FastAPI, SQLAlchemy ORM, and PostgreSQL with modular router architecture (employees, attendance, dashboard) and Pydantic validation.
- Implemented advanced attendance features including status tracking (Present, Absent, Late, Half Day), date-range filtering, per-employee summaries, and live attendance rate metrics.
- Designed responsive UI with reusable components, confirmation dialogs, toast notifications, loading/error states, and mobile-optimized layouts.

NBFC Mobile App Backend (Anekk) | *Python, Django, DRF, SQLite, PostgreSQL*

- Built mobile-app backend with full KYC (Aadhaar, PAN, video, selfie), loan application flow, multilingual support, and employee dashboards.
- Integrated e-sign, PDF generation, notifications (SMS, WhatsApp, email, push), and complete loan disbursement lifecycle.

Automated Web Scraping System | *Python, Selenium, BeautifulSoup, Pandas, MySQL*

- Created automated website scrapers with proxy rotation, dynamic waits, CAPTCHA bypassing, and structured data storage for analytics.

Honors And Awards

Best Performer Certificate (Jewar International Technologies Pvt Ltd) - Recognized for outstanding performance, backend system contributions, and high-impact feature delivery.
Rising Star Award (Jewar International Technologies Pvt Ltd) - Awarded for rapid growth, ownership of critical modules, and consistent technical excellence.
Best Photography/Drawing Award (Madan Mohan Malaviya University of Technology) - Recognized for outstanding creative contribution during the "Azadi Ka Amrit Mahotsav" celebration event.
